CSA0412-OPERATING SYSTEMS

EXP 10-Implement a process synchronization

```
public class Main {
   private static int count = 0;

   public static synchronized void increment() {
      count++;
   }

   public static void main(String[] args)
         throws InterruptedException {

      Thread t1 = new Thread(() -> {
         for (int i = 0; i < 1000; i++) {
            increment();
         }
      });

      Thread t2 = new Thread(() -> {
         for (int i = 0; i < 1000; i++) {
            increment();
         }
      });

      t1.start();
      t2.start();

      t1.join();
```

```
        t2.join();

        System.out.println("Final Count: " + count);
    }
}
```

Output

```
Final Count: 2000
```
